

## DUPLEX PUMP

## CONTROL PANEL

### LOWER COST AND FEWER COMPONENTS FOR YOUR BOILER FEED AND CONDENSATE PUMPS

Steam Control Products' motor control panel offers a reduced size for use in smaller areas, with fewer components to replace and a 25% lower cost than comparable NEMA-rated control panels. The panel uses a Motor Circuit Protector (MCP) which supplies the same functions as fuses, starter and overload protection all in one unit, eliminating the need for six different components. The MCP meets all codes for inspection for both United States and European customers. The panel can also be remote-mounted to save on valuable space.

#### Features

- Motor circuit protector (MCP)
- HOA selector switch
- External reset
- Control circuit transformer
- Pilot light (pump running)
- Removable mounting plate and terminal strip in a single NEMA 12 enclosure
- Mounted and wired with single-point connection
